

CARQON

Quick guide

Box cover

Using the box cover

Handy and sturdy cover to close the box at any time. The cover is equipped with curved slats to drain any rainfall from the sides. Smoothly attachable with handy elastic and practical Velcro tape.

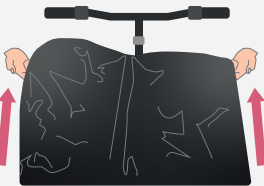

1

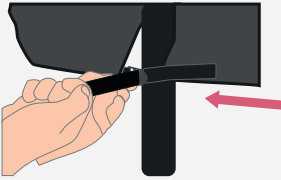

- EN** Pull the elastic front of the cover around the front of the box
- NL** Trek de elastische voorkant van de bakhoes over de voorzijde van de bak
- FR** Tirez le côté avant élastique de la housse de protection sur l'avant du bac.
- DE** Ziehen Sie das elastische vordere Ende der Regenschutzplane von vorne über die Transportbox.

2

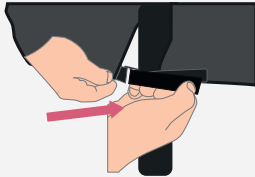

- EN** Guide the rear of the box cover over the back side of the box with both hands
- NL** Geleid met beide handen de achterkant van de bakhoes over de achterkant van de bak.
- FR** Utilisez vos deux mains pour bien positionner la housse sur l'arrière du bac de transport.
- DE** Führen Sie mit beiden Händen das hintere Ende der Regenschutzplane über die Rückseite der Transportbox.

3

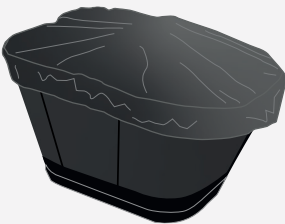

- EN** Pull the Velcro fastener on the rear side of the cover, over the steering tube and through the buckle.
- NL** Trek het klittenband aan de achterzijde van de bakhoes, over de stuurbuis en door de gesp.
- FR** Faites passer la fermeture Velcro située à l'arrière de la housse derrière le tube du guidon et glissez-la à travers la boucle.
- DE** Ziehen Sie das Klettband am hinteren Ende der Regenschutzplane über die Lenkstange und durch die Schnalle.

4

- EN** Pull the Velcro fastener to the opposite direction and attach the Velcro fastener.
- NL** Trek het klittenband in de tegenovergestelde richting en bevestig het klittenband.
- FR** Repliez la fermeture Velcro sur elle-même et attachez-la.
- DE** Ziehen Sie das Klettband in die gegengesetzte Richtung und befestigen Sie das Klettband.

5

- EN** The box cover is provided with a tensioner to prevent accumulation of water.
- NL** De bakhoes is voorzien van een spanner welke dient voor het afvoeren van water.
- FR** La housse de protection est munie d'un tendeur permettant d'éviter l'accumulation d'eau.
- DE** Die Regenschutzplane ist mit einer Spannvorrichtung zum Ableiten von Wasser versehen.
